

Marry Abroad Simply Scan Guide

It is very important that when we present your documents to the Authorities that they are good, clear high quality scans, we can see all four corners of the document and we can read all the small print on the document.

Please scan the documents, DO NOT use images and then crop the document and we cannot clearly see all the corners and edges.

As the Agency of Family Law need to be able to zoom in very closely, we will also ask you to take a photo with your phone of any passport data pages and both sides of any residence permit and/or ID cards.

All scans and photos need to be on a white background and clearly lit.

Please see the example below.
